SAND ART

How it works

Work with your sand picture in a box or on a tray. That way all the bits stay under control.

Choose your sand colour & sprinkle the sand gently over the peeled-off sticky section.

Keep going, colouring-in all the different sections with different colours, until you have finished your fantastic picture.

Inside the black line, the yellow paper has been lasercut. Slide the edge of the little stick under a corner and gently lift and peel off the yellow layer to reveal the sticky underneath. Do not lift the black lines.

Lift the picture and tap the excess sand off into the container or onto the tray.

If any sand gets spilt we recommend that you simply vacuum it up, do not use a wet cloth or apply water. Sand art is not a toy. Not suitable for children under 3 years of age. Sand is not for eating.
